Background

• National Dual Diagnosis Programme
  (National Mental Health Development Unit (NMHDU), Department of Health)

• Commissioned PROGRESS in partnership with Coventry University
  • develop an innovative online awareness raising resource
Aims

• Develop and evaluate an e-learning training resource for practitioners, service users, carers and the public for dual diagnosis awareness

• Awareness of the basic issues

• Not intended to create dual diagnosis “specialists” or replace skills-based training,
• based on level 1 capabilities set out in

• Mapped
  – KSF
  – National Occupational Standards MH
  – Drug & Alcohol National Occupational Standards
How to access?

• Two versions
  – Independent
    http://wwwm.coventry.ac.uk/researchnet/publichealth/projects/Cu
    rrentprojects/Pages/DualDiagnosis.aspx
  – Through NHS organisation
    • Individual learning management systems
    • National Learning Management System
Format

• Video content
  – Service user and carers perspectives
• Interactive quizzes
• Key documents
• Want to know more
Content

• Four modules
  – Introduction to dual diagnosis including definitions, impact and attitudes
  – Mental health awareness and how it impacts on drug/alcohol use
  – Substance use awareness and how it impacts on mental health
  – Skills and interventions focusing on the process of change and what helps.
IT Requirements

• Modern PC with sound facility
• Internet broadband connection
• Flash player software
Let's take a look...

Try the dual diagnosis e-learning resource
Evaluation

- 528 started evaluation survey
  - 492 completed (93.2%)
- 477 workers (90%)
- 26 carers
- 3 SU
- 22 interested members of the public
• 55% from NHS mental health service
• 8% NHS D&A
• 13.5% non-stat D&A
• 13% charities e.g. MIND
How did you hear about the e-learning resource (tick the main source only)
